## Mineral Statistics The New Agen-

cy.

[From the American Journal of Mthing.] iFrom the American Jennal of Mining.]
Secretary McCalloch evidently loves wine, wit and poetry, Judging from the fact that J. Ross Browne, who recently presented him with a case of California wings, accompanied by: a witty poem, has since been appointed special agent has the United States Treasury Department for the collection of mining statistics—Congress having made an appropriation of \$15,000 for that purpose. Against this appointment however, we have nothing to say. On the contrary we conceive that Mr. Browne is in many respects the very man for the plage. He we conceive that Mr. Browne is in many respects the very man for the place. He has traveled extensively, and hence has acquired not only liberal views of men and things with that suavity which neutralizes the disagreeable prying-into-propile's business air that almost invariably hangs short such a mission as the one he has assumed. He has written much and well and hence we have experienced. much and well, and hence we may ex-pect his report to be thorough and ex-ceffent reading. He has been much in pret his report to be thorough and ex-cellent reading. He has been much, in the mining districts, and hence must have gained some degree of knowledge the mining, milling, etc. We pressine be knows what he is about, and on the spassage to California—he were by the last steamer—will map out the system upon which to operate. Among other statistics important for the country to have will be: the number and extent of alluvidit, vein and o h r a 11 staken up, but not actively worked, how much has been expended on them, and what are the prospects; the number, extent and value of similar mines actively worked, the prespects; the number, extent and value of similar mines actively worked, their yields of ore, of bullion, and the coast of extraction from mine and reduction works; the average earnings in the different districts of miners, milliment, etc., whether working for themselves or for others; the number, on packly, each of construction, coasts and results of processes, etc., in the various reduction works, and whether driven by steam or water; the amounts of foreign retaction water; the amounts of foreign and home capital invested in our mines and mills; the number of foreign miners, those naturalized and those born in this country; the number of dividend-declaring mines and those that promise dividends; the gross amount of mineral or metal-bearing territory now being worked, the gross amount taken up but numbered, the gross amount taken up but numbered, with accompanying map. These he might ascertain the amount of precious matals wasted by the various processes, with the quantity of tailings pregreated for future working; the amount of gold, eliver, copper, lead, the gross amount state, granite, precious stones, activacted against 19; the amounts of mineral states and the producing States and Territories, as steam or water; the amounts of foreign

the producing States and Territories, as well as the amounts exported; effects of the various kinds of mining upon the maints, health, morality and intellect of those engaged; with the temperatures of the various mining regions. The event well done, will be of incalculable value not alone to the mining interest, that to the nation at large. We therefore hope that all miners and mill men—even those of "Washoe," who were once agricled at Ross Browne's account of his Sirst visit to Virginia City—will furnish the special agent with correct data for his report, and that he will be so very careful in his collection and statement of facts and figures, as to be willing to swear to the best of his knowledge and belief, to their accuracy.

The Southern delegates met at the National field at 10 a.m. A prayer was offered by Rev. Dr. Bedell.

A telegram was received from the Republican State Committee at Syracuse congratulating the Convention upon the f vorable auspices under which its seasions were being held. It was received amidst great applause.

Mr. Humilton, of Texas, reported the following geodutions, which were analysis.

Mr. Hamilton of Texas, reported the following resolutions, which were manifomely adopted:
Resolved, That the loyal people of the South cordially unite with the loyal people of the North in thanksgiving to the Almighty God, through whose will a rebellion, unparalleled for its causelessness, its cruelty and its criminality, has been overruled to the vindication of supremacy under the Federal Constitution over every State and Territory of the Republic.

Resolved, That we demand as we have demanded at all times since the constitution of hostilities, the restoration of the States in which we live to their end relation with the Union on the simplest conditions consistent with the protection of quelly se, property and political rights, now in jeonardy from the unquenched endity of Rebels lately in arms.

Resolved, That the unhappy policy

ical rights, now in jeopardy from the unquenched eamity of Rebels lately is carms.

Resolved. That the mbaspy policy of Anfirev Johnson. President of the United States, is, in its effects upon the loyal people of the South, unjust and oppressive, and abcordingly, however ardently we desire our respective States once more to be represented in Coppress, we would deeply regret the restoration on inadequate conditions presented by the President are calculated not to abate but only to magnify the perils and horrors of our condition.

Resolved, That the welcome we have seedived from the loyal citizens of Philadelphis under the roof of the time bonored hall in which the Beclaration of Independence was adopted, inspires us with hope, that the principles of just its origin, shall become the cornerstone of the Coestitution.

Resolved, That with pride in the particular of Congress, and with gratifued for the fearless and persistent support they have given to the cause of loyalty, and their efforts to restore all the States to their former conditions as States in the American Union, we will stand by the position taken by them and take all means consistent with a peaceful and lawful course to secure the railtentian of the Union, as proposed by Congress

That the political status of the States lately in rehellion to the United States lately in rehellion to the United States are political questions and are therefore clearly within the control of Congress, to the exclusion of and independent of any and every other department of the Government.

Advices from La Paz, Arizona, to August 23d state that a few days previous his Indians atticked a train on the Presoci road, near Skull Valley, and captured the whole outful wagons, teams and cargoes. The whites, eleven in number, were allowed to return to the station. Next day they were reinforced and started out again, and were attacked by the Indians, when a fight occurred and the Indians when a fight occurred and the Indians were routed with a loss of twenty-three killed and a number captured.

California Items

The valley of Little Litt. Mendocino There are not over fifty families mento known as H. A. Caulfield. He Came to California At an early, day, set tled in Sacramento, and soon ranked among the most turbulent spirits of that community. From that day to this he has periodically figured in the poshot strippeds. The last effect occurred on the 27th pit, the details of which appear in the Unive. He had, a dispute about a sale of property with John Byrnes, Ballin of the Supreme Court. The latter, on being abased, struck Caulifeld over the head with a came. C. then rushed at him with a meat ax and Byrnes falling, was at his mercy. He cut B. terribly before desisting. Caulfield justifies his conduct... On Wed-resday morning last Joe Melster, was found dead in his cabin, near the resi dence of W. Vernon, in Gold Hill, in Eldorado county, by Mr. Penwell. He was aged about 45, and indulged occasionally in drinking ... Rev. Dr. Scudder delivered another interesting ler-ture on "India;" in Stockton, on the 27th ult ... . A society has been organized in Stockton called the "Stockton Pramatic Amateurs." E. L. Houche is the President.... A daily mill was to have been put in operation between San' Jose' and Monterey on the 1st of September.

NEWSPAPER ENTERPRISE. We learn, from a reliable source, that the recent cable dispatches, published in a single impression of the New York Herald, cost the proprieton of that journal about \$5.500, in coin, Were it not for the Herald's enterprise the cable would be of comparatively little benefit to us in the way of general news from Europe, as there is not another journal on the continent that would undergo so heavy an expense, to supply news to the thousand and one newspapers throughout the country.

This morning we have news from London and Paris to a late hour last evening. When the minor arrangements will have been completed, as the difference in time is about five hours in our favor, we may expect news from Europe shead of time. This news would also reach San Francisco shead of time, if transmitted thither immediately on its receipt here, were it not for the faulty arrangement at Salt Lake City, by which the desayathers a. Lake City, by which the despatches a-taken off the wire and re-transmitted.re

The displacement of Gen. Terry in Virginia does not imply any dissatisfac-tion with his rigid policy toward the rebellions. Major General Schofield, who succeeds him, is not a man to tolerwho succeeds him, is not a man to tolerate treason or anything that looks in that direction. This and other changes in the various commands are made on the principle of giving the officers of the regular army important positions associating to their rank. Gen. Tarry will have a chance to do good service at the West, and we may be certain that there will be no bogus Indian wars under his administration. If it is necessary to fight the Iodians it will be done in carmest and effectually.—Springfield Republicant
